6"	2	2	1	2	1	1	2	2

Armour: Void plate

Weapon	Dmg	Short	AP
Carbine	2d8	18"	0
Handy			
Knife or bayonet (close combat)	2d8	—	0

Grenades: Flashbang, Frag grenade

Gear

Jump pack: Move ignores the extra cost of obstacles and may cross gaps up to half the model's Move. In zero-g, the model may change direction freely during a Move and stop anywhere, even away from a surface (it still counts as unbraced).
Low-light optics: The carrier has the Low-light skill: it ignores the darkness penalty.

Skills

Leader: A Rally made by a Leader, or on a model within 6" and in line of sight of a Leader, removes 2 Suppression instead of 1. At initiative, each side adds the Nerve of its Leader with the highest Nerve.
Void-trained: Ignores the unbraced zero-g penalty; may push off and stop at any surface.

BLKOUT Manticor Borz Group: Cyka Bravo

Enemy awareness

Solo opponent reference 1 of 3

Awareness

Unaware: Busy with its work. Does not activate or react. Becomes Alerted when its element sees a player model, hears noise, is hit, or the alarm is raised.
Alerted: Knows something is wrong but has no target in sight. Activates using its profile's No target list, toward the marker.
Engaged: Any Alerted model that can see a standing player model when it activates or reacts. Uses its profile's Target in sight list.
At the start: Elements start Unaware unless the mission says otherwise. Automated models, and models the mission places on Overwatch, start Alerted.

Noise

Quiet (Moving, opening and closing doors, hacking, close combat, Silenced shots, smoke grenades): not heard.
Loud (Unsilenced shooting, forcing a door with a breaching tool): Elements with a model within 12" aboard ship, measured through walls; within 24" on land; alert +1.
Very loud (Frag grenades, flashbangs, breaching charges, any explosion): Every element on the board; alert +2.

The marker

• Place or move the marker to the source of the latest noise, or to where an enemy model last saw a player model.
• An Alerted model that ends a Move within 3" of the marker, seeing no player model, removes it. Its element then holds where it is.
• With no marker on the board, Alerted models hold: stay in cover facing the nearest approach and go on Overwatch.

The alarm

• When an element first sees a player model or is hit, it raises the alarm at the end of its next activation: every element on the board becomes Alerted, and the alert track rises by 1.
• If every model of the element is Down, Dead or has surrendered before then, the alarm is not raised.

Enemy turn

Solo opponent reference 2 of 3

Who activates next
1. A Leader with a friend within 6" that has 2 or more Suppression.
2. Engaged models in the open.
3. Other Engaged models, most Suppression first.
4. Alerted models, nearest the marker first.
5. Unaware models do not activate.

Targets
1. Ignore Down, Dead and surrendered models unless nothing else is in sight.
2. A player model it can hit without a cover penalty, nearest first.
3. Otherwise the player model in the least cover, nearest first.
4. Auto weapons spread to every other player model they can engage.

Moving
• To cover: the nearest position in cover within the Move, Heavy before Light. If the line says "with a target", it must still see one; otherwise it ends out of sight of every player model if it can.
• Toward the marker or a target: by the shortest route (through doors aboard ship or in buildings; on land, from cover to cover where the route allows), ending in cover if it can. Enemy models open locked doors on their own vessel or ground with an Interact.
• Away: by the shortest route out of sight of every player model, ending in cover.

Surrender
• A model whose profile allows it tests when it activates Pinned or Wounded with a player model within 6" in its line of sight: 2d6 + Nerve, 8+, or it surrenders.
• A surrendered model lies down, takes no actions, cannot react and is not a target. It is a prisoner if the mission allows it.

Tie-breakers
1. The option nearest the enemy's objective, or the marker if there is no objective.
2. The lowest-numbered enemy model, or the player model nearest the enemy's objective.
3. Roll a die.

Terms
Area: Where a model is: a compartment, passage or junction aboard ship; on land, a building, a terrain piece, or the open ground between them.
Approach: A way an enemy can come into a model's area: a door aboard ship; a door or window of a building; on land, the side of the model's cover that faces the marker.
Exit: The entry point the mission gives the enemy, a secondary airlock or escape pod aboard ship, or the enemy's board edge on land.

Drill and close quarters

Solo opponent reference 3 of 3

Drill: set by the element's lowest rank; a friendly Leader within 6" raises it one step.

Green, No drill: Each model follows its lists alone. Shoots instead of Aiming, never cracks doors, and throws grenades only where its list says.
Regular, Fire and manoeuvre: A model ends a Move in the open, in sight of a player model, only while a friend of its element covers it: on Overwatch, or Engaged with the same target. Otherwise it stops in the last cover on its route, or goes on Overwatch instead of moving. Charges are exempt.
Veteran, Bounding and grenades: As Regular, and: throws a frag at 2 or more player models within its blast radius, with no friend in it; at a closed door (aboard ship or into a building) with the marker or a seen player model beyond, cracks and throws (flashbang first, else frag); the last model of the element to activate each round goes on Overwatch if it has no target.
Elite, Assault drill: As Veteran, and: focus fire, shooting the player model its element has already hit this round if it can see it; picks Leaders and Auto gunners first at each step of the target list.

Close quarters

Used first by an Engaged model with a player model within 6", unless its profile says otherwise. Read top-down.
1. Outnumbered (more standing player models than friends within 6" of it) and not Aggressive: Move away, then Shoot if it still has a target.
2. Fight 2 or more, a target within its Move, and Aggressive or Tactical: charge it (close combat).
3. Two or more player models within a frag's blast radius of one point, no friend in it, and it carries frag: Throw it, then Move to cover.
4. Otherwise: use its profile's Target in sight list.

Saboteur

Enemy behavior profile · proposed

Avoids fights; works consoles, rigs charges, seals doors, destroys evidence.
Used by: Salvage techs.

Target in sight (Engaged)

1. Pinned or Wounded, with a player model within 6" in sight: test to surrender, then carry on down the list if it passes.
2. Within 1" of its task: Interact (the mission says what each Interact achieves), then Interact again.
3. In the open: Move away, then Throw smoke between itself and the target if it has one.
4. Otherwise: Shoot, then Move away.

No target (Alerted)

1. An open door between it and the marker within its Move: Move to it, close it and lock it (Interact). No such door (in the open): skip this line.
2. Otherwise: Move to its task and Interact.

Investigates: None. Saboteurs work their task and seal doors.

Reactions

• Unactivated: when shot at, Move away.
• Never goes on Overwatch.

Close combat

Breaks after any lost exchange. May surrender.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

Sentry

Enemy behavior profile · proposed

Holds chokepoints, overwatches approaches, raises the alarm.
Used by: Asset security, Borz Bratva team.

Player model within 6": close quarters first (reference card).

Target in sight (Engaged)

1. In the open: Move to cover with a target, then Shoot.
2. Auto weapon with two or more targets in sight: Suppressive Fire, then Shoot.
3. A target within short range: Aim, then Shoot.
4. Otherwise: Shoot, then Overwatch.

No target (Alerted)

1. The investigator: Move toward the marker, twice.
2. Already in cover covering the approach to its area nearest the marker: Overwatch.
3. Others: Move to cover covering that approach, then Overwatch.

Investigates: One model: the lowest-numbered model without an Auto weapon. The rest hold.

Reactions

- Overwatch: Shoot at the first trigger it can.
- Unactivated: when shot at in the open, Move to cover.

Close combat

Breaks after a lost exchange if Wounded or with 2 or more Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

Leader

Enemy behavior profile · proposed

Rallies the most suppressed friend nearby, then acts with its element.
Used by: Recovery captain, UN Battalion Controller, UTG Mother.

Player model within 6": close quarters first (reference card).

Target in sight (Engaged)

1. A friend within 6" with 2 or more Suppression: Rally the most suppressed, then take one action from the line below.
2. Otherwise act as the profile of the nearest friendly element (Sentry if it is alone).

No target (Alerted)

1. A friend within 6" with 2 or more Suppression: Rally it.
2. Otherwise act as the profile of the nearest friendly element (Sentry if it is alone).

Investigates: Goes with the nearest element; raises its drill one step while within 6".

Reactions

- As the nearest friendly element.

Close combat

Breaks after a lost exchange if Wounded.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

Aggressive

Enemy behavior profile · proposed

Closes distance, flanks through side passages, seeks close combat.
Used by: Collections enforcers, Repossession team, Contract reaction force, Borz Cyka team, Ubiytsa shock team, Harlow veterans, UN Pointmen.

Player model within 6": close quarters first (reference card).

Target in sight (Engaged)

1. Fight 2 or more and a target within its Move: charge it.
2. A target within short range: Shoot, Shoot.
3. Otherwise: Move toward the nearest target, then Shoot.

No target (Alerted)

1. Move toward the marker, twice. Prefer a route that does not pass through a door or open ground a player model can see (flanking).

Investigates: Every model.

Reactions

- Overwatch: Shoot at the first trigger it can.
- Unactivated: when a player model comes within short range in its sight, Shoot.

Close combat

Never breaks while it has fewer than 3 Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.
