Imperator Black — Land Battles

Rules chapter 12 · content v0.5.0

Terrain

Terrain	Cover	Movement	Line of sight
Open ground	None. Find Cover works here (chapter 4).	Normal	Clear.
Scrub, crops, light woods	Light, for a model inside it.	Normal	Models see into and out of it, but not through more than 3" of it.
Dense woods, jungle	Light, for a model inside it; Heavy if it is also behind a trunk or rock (true line of sight).	Difficult (each inch costs 2")	Models see into and out of it, but not through more than 1" of it.
Rubble, scrap, ruins	Light, for a model inside it; Heavy behind standing walls.	Difficult (each inch costs 2")	Use true line of sight; standing walls block it.
Low wall, sandbags, barricade, fallen tree	Heavy, for a model within 1" behind it.	Obstacle (+2")	Does not block line of sight.
Hedge, fence, crop row	Light, for a model within 1" behind it.	Obstacle (+2")	A hedge blocks line of sight, except to and from models within 1" of it. A fence does not.
Wire	None.	Difficult (each inch costs 2")	Does not block line of sight.
Container, vehicle, wreck, rock, tank	Heavy, for a model behind it.	Blocked	Blocks line of sight.
Building	Walls block sight. A model at a window or doorway, or behind a roof parapet, has Heavy cover.	Through doors (chapter 3); climbing through a window is an obstacle.	Through doors, windows and holes only.
Bunker, reinforced building	As a building; its walls cannot be breached.	Through doors only.	Through firing slits and doors only.
Crater, ditch, trench	Heavy, for a model inside it against shooters outside it.	Getting in or out is an obstacle.	A model moving along a trench is out of sight of models at ground level outside it, unless they are within 3" of its edge.
Hill, ridge, dune, raised platform	Light, for a model within 1" behind the crest, against shooters below it.	Normal; climbing a sheer face is an obstacle per 3" of height.	The crest blocks line of sight between models on opposite sides below it.
Water	None.	Shallow: difficult. Deep: impassable.	Clear.

Height

• Each storey, platform or level is 3" high. Climbing stairs or a ramp costs the vertical distance as well as the horizontal; a ladder costs double the vertical distance.
• Height advantage: a shooter a full level or more above its target ignores Light cover from linear terrain, and treats Heavy cover from linear terrain as Light.
• Jumping down up to 3" is free. A model that jumps or falls further tests 2d6 + Physique, 8+; on a fail, roll 2d6 on the wound table (2d8 if the drop was more than 6"), stepped down by armour as normal.

Conditions (d6)

d6	Conditions	Effect
1–3	Clear	No effect.
4	Rain or wind	−1 to hit beyond 18". −1 to Throw tests.
5	Fog	Models are seen only within 18" (12" in a dust storm in the desert).
6	Night	Darkness (chapter 8): models are seen only within 12".

Noise in the open

On land, Loud noise is heard by elements with a model within 24"; Very loud noise by every element on the board. Inside a closed building, 12".

Setting up a land table

• **1. Environment:** from the mission, or roll: 1 Urban · 2 Industrial · 3 Woodland · 4 Jungle · 5 Desert, badlands · 6 Farmland. Fortified positions by mission only.
• **2. Board:** Up to 8 a side: 36" × 36" (3 × 3 sectors); 9 to 16 a side: 48" × 48" (4 × 4 sectors); Larger, or long advances: 60" × 36" (the dry-erase map) (5 × 3 sectors).
• **3. Sectors:** divide the board into 12" squares; roll once per sector and place the result near its middle, facing your choice.
• **4. Density check:** three sectors in a line, edge to edge, with no cover? Change the middle one to the environment's Fill.
• **5. Conditions:** roll once. **6. Deployment:** player within 6" of a rolled edge; enemy in the farthest sectors; its exit is its own edge.

d6	Urban	Industrial	Woodland	Jungle
1	Street: one wreck or vehicle (solid).	Yard: two containers (solid).	Open ground.	Scrub, 6" × 6".
2	Rubble, 6" × 6", with a standing wall.	Tanks or pipework (solid), about 6" across.	Scrub, 6" × 6".	Dense jungle (woods), 9" × 9".
3	Small building, 6" × 6", one storey with a flat roof.	Warehouse, about 6" × 9", one tall storey with a gantry inside.	Woods, 6" × 9".	Dense jungle (woods), 6" × 6", and a fallen tree (low wall).
4	Large building, about 6" × 9", two storeys.	Scrap heap (rubble), 6" × 6".	Woods, 6" × 6", and a fallen tree (low wall).	Stream across the sector (shallow water), with scrub on its banks.
5	Ruined building: walls without a roof, rubble inside.	Crates and low walls (low wall), two pieces.	Hedge or fence line across the sector.	Overgrown ruins: rubble with a standing wall.
6	Barricade (low wall) across the sector, and a wreck.	Raised platform or gantry (hill, one level) with ladders.	Rocky outcrop: a hill with two rocks (solid) on it.	Rocky rise: a hill with a rock (solid).
Fill	Rubble, 6" × 6".	Two containers (solid).	Scrub, 6" × 6".	Scrub, 6" × 6".

d6	Desert, badlands	Farmland	Fortified position
1	Open ground.	Open field.	Trench across the sector, with a firing step.
2	Open ground with a crater.	Crops (scrub), 9" × 9".	Sandbag line (low wall).
3	Rocks: two pieces (solid).	Hedge or stone wall (low wall) across the sector.	Bunker, about 6" × 6", with firing slits.
4	Dune or ridge (hill) across the sector.	Farm building, 6" × 6", two storeys.	Crater field: two craters.
5	Scrub, 6" × 6".	Copse (woods), 6" × 6".	Wire across the sector.
6	Outpost: a small building and a low wall.	Vehicles or machinery: two pieces (solid).	Rubble, 6" × 6".
Fill	Two rocks (solid).	Hedge line across the sector.	Crater.

Solo opponent terms

• **Area:** Where a model is: a compartment, passage or junction aboard ship; on land, a building, a terrain piece, or the open ground between them.
• **Approach:** A way an enemy can come into a model's area: a door aboard ship; a door or window of a building; on land, the side of the model's cover that faces the marker.
• **Exit:** The entry point the mission gives the enemy, a secondary airlock or escape pod aboard ship, or the enemy's board edge on land.
