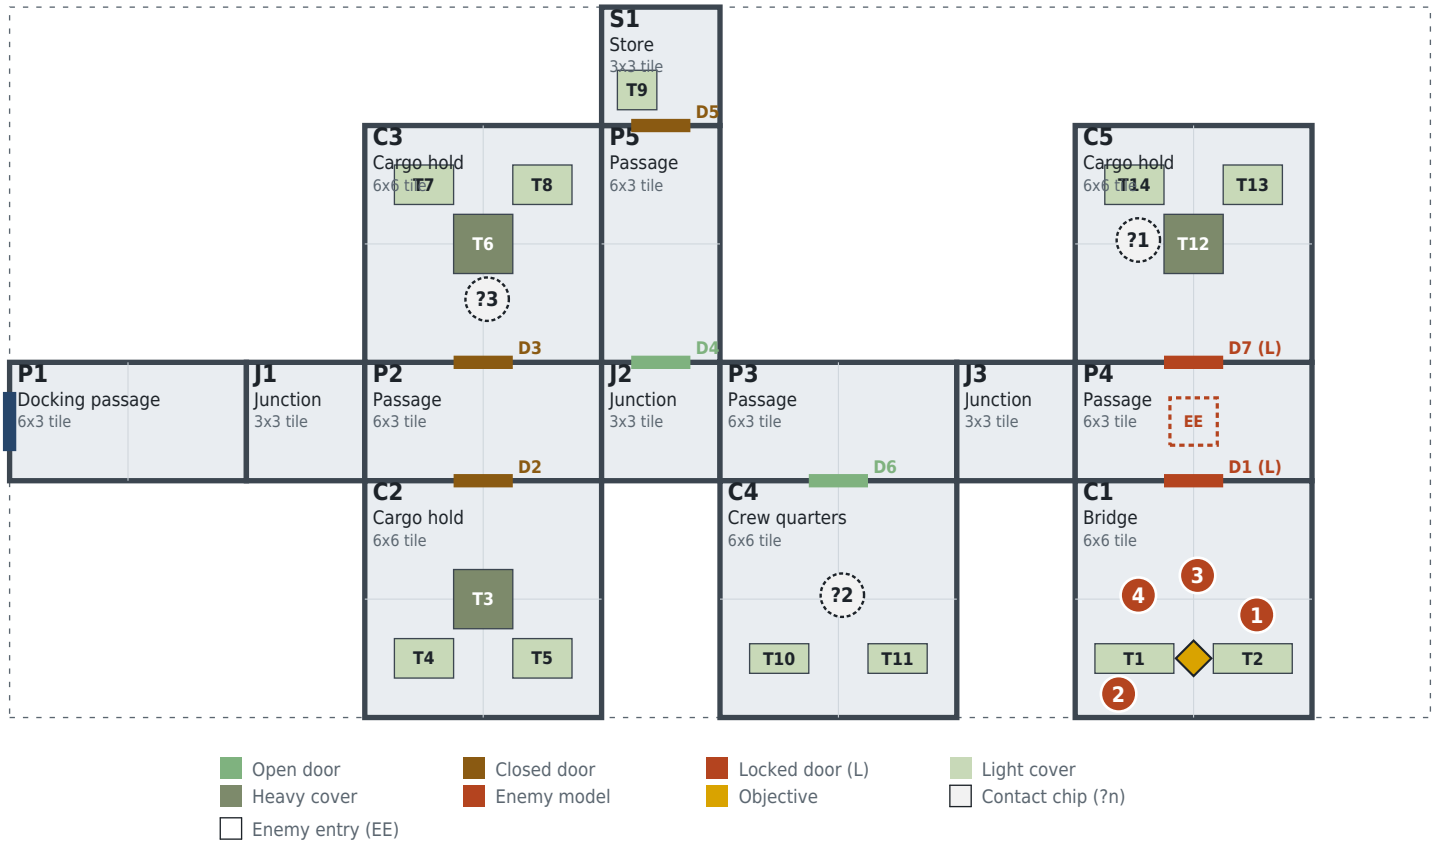
Capture a high-value target: Freighter, mission 42

Imperator Black mission · rules v0.5 · chapter 13 · aboard ship · threat tier 1 · seed 42 · solo

Tasking. Capture a high-value target. Take a named enemy alive and bring them out.

Situation. Freespace Solutions hold a freighter. The recovery captain is in the bridge (C1) with a guard. Taken alive, they will talk.



Scale: each grid square is 3". Board 36" × 18". The blue bar is the airlock: the way in and out. Enemy models (numbered) are the guard, placed openly. Contact chips (?n) are hidden contacts: roll for them when revealed.

Objective. The bridge (C1). The high-value target (HVT) is the tier's HVT model, placed at the objective with the guard. Take it by overpowering it in close combat, capturing it while Down (chapter 7), or when it surrenders: the HVT tests to surrender (chapter 10) whenever it is Pinned or Wounded with a player model within 6" and no friend within 6". A prisoner moves with a player model in base contact, which halves that model's Move.

Opposition. Freespace Solutions, threat tier 1. Guard (known): Asset security (3 models) with the Recovery Captain, at the objective, Unaware. Contacts (unknown): 3 chips.

Ground. Freighter / ore hauler, deck 42. Hazard: Power failure: the whole deck is in darkness (chapter 8).

Complication. Hazard: see Ground.

Extraction and time. Out by the airlock (P1). Enemy entry and exit: P4. Small mission: 20 minutes, clock die d4. Check-ins every 5 minutes from minute 10. Alert track starts at 0.

Capture a high-value target

Taking it. The high-value target (HVT) is the tier's HVT model, placed at the objective with the guard. Take it by overpowering it in close combat, capturing it while Down (chapter 7), or when it surrenders: the HVT tests to surrender (chapter 10) whenever it is Pinned or Wounded with a player model within 6" and no friend within 6". A prisoner moves with a player model in base contact, which halves that model's Move.

Lockdown (alert 6). The HVT runs: from now on it activates first each enemy turn, using the Handler profile's escape line toward the enemy's exit. If it leaves the board, it has escaped.

Grade	Result
Decisive	HVT extracted as a prisoner and no player model Dead.
Marginal	HVT extracted as a prisoner, or Dead (with the body or its data recovered: an Interact in base contact).
Failure	HVT escaped or still at large when time runs out.

Alert track and clock

Raises: Loud noise (chapter 10) +1; Very loud noise +2; An element raises the alarm +1; Each check-in the clock reaches or passes (a check-in is missed) +1. Starts at 0.

At 2: Contacts move: at the end of each round, every contact moves 6" toward the marker (or toward the player entry if there is no marker), by the shortest route. Unrevealed elements become Alerted when revealed.
At 4: Reinforcements: at the end of the round, the tier's reinforcement element arrives at the enemy's entry, Alerted.
At 6: Lockdown: the mission type's lockdown happens at the end of the round.

Clock: 20 minutes, clock die d4. At the end of each round roll the clock die: that many minutes pass; then resolve the alert track. Check-ins at minute 10 and every 5 after: each one reached or passed raises the alert by 1. Time runs out at the limit: the mission ends.

Contacts (threat tier 1)

1. A contact is revealed when a player model can see it, or ends a Move within 3" of it. Roll on the tier's contact table.
2. Place the element with its first model on the chip and the rest within 2", in cover where they can be; then remove the chip.
3. A revealed element is Unaware while the alert track is below 2, Alerted from 2 on. Either way, newly placed models cannot react until the current activation ends.
4. A contact that moves into sight of a player model is revealed at once.

d6	Contact	Models	Behavior
1	False alarm	Nothing there: crew who fled, a ventilation fan, a stray animal. Remove the chip.	—
