Gear

Jump pack [proposed]: Move ignores the extra cost of obstacles and may cross gaps up to half the model's Move. In zero-g, the model may change direction freely during a Move and stop anywhere, even away from a surface (it still counts as unbraced).
Low-light optics: The carrier has the Low-light keyword: it ignores the darkness penalty.

Keywords

Leader: A Rally made by a Leader, or on a model within 6" and in line of sight of a Leader, removes 2 Suppression instead of 1. The side's highest-Q Leader adds its Q to initiative.
Void-trained: Ignores the unbraced zero-g penalty; may push off and stop at any surface.
