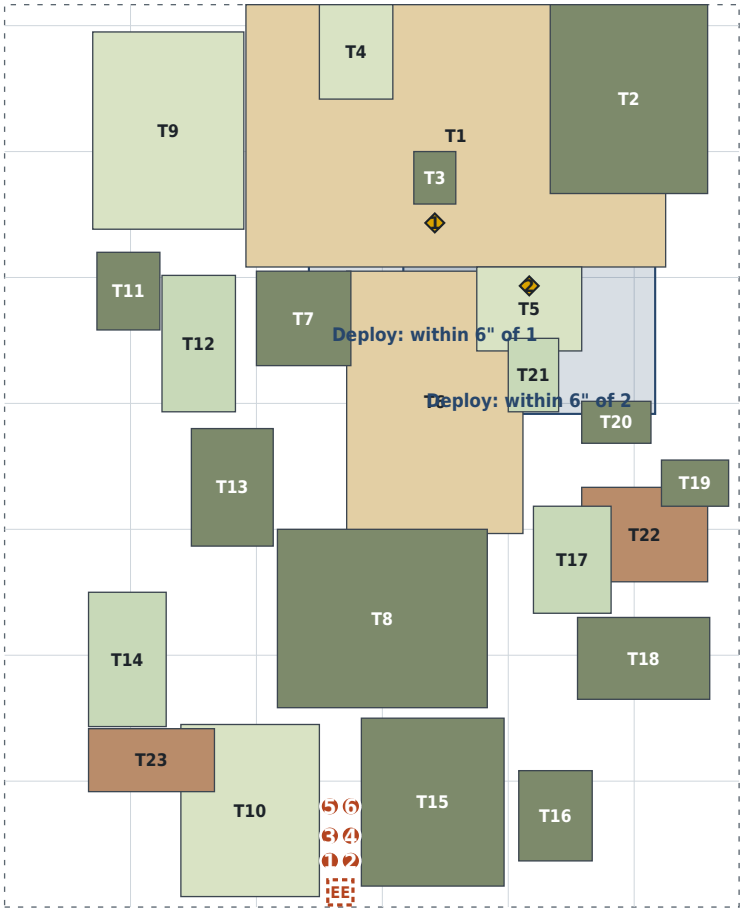
Gym 4: Hold the Outpost

Imperator Black base defence gym scenario · rules v0.5 · solo · about 60–90 minutes

The Republic has turned the mesa into a forward outpost. The old relay now reports for the clone battalion, and the dug-out at the mesa's foot holds its stores. The threat track has reached 4: a Separatist droid column is coming up through the spire flats. Commander Tano's squad, two sandbag positions and a pair of automated turrets must hold until the gunships arrive.



Raised ground · Area terrain · Crater or trench · Low wall or hedge
Solid or building · Enemy model · Deployment · Objective

Each grid square is 6". Board 35" × 43", played lengthwise: the outpost is the mesa at the top; the droids enter at EE, the gap between the spire field (T10) and the spire mound (T15) at the middle of the bottom edge. Shaded boxes mark the deployment areas: deploy within 6" of either objective. Enemy positions are where the first wave arrives.

Galactic Republic (8)

- Ahsoka Tano (Commander)
- Clone Sergeant (Sergeant)
- Clone Trooper (Trooper)
- Clone Trooper (Trooper)
- Clone Trooper (Trooper)
- Clone Heavy Trooper (Heavy (Z-6))
- Sentry Turret (Turret, objective 1)
- Sentry Turret (Turret, objective 2)

Separatist Alliance (6)

- 1. B1 Battle Droid (E-5 blaster rifle): Arrives at EE at the end of round 1, Alerted
- 2. B1 Battle Droid (E-5 blaster rifle): Arrives with model 1
- 3. B1 Battle Droid (E-5 blaster rifle): Arrives with model 1
- 4. B1 Heavy Weapons Droid (E-5C heavy blaster rifle): Arrives with model 1
- 5. Droideka (Twin blaster cannons): Arrives with model 1; Aggressive
- 6. Droideka (Twin blaster cannons): Arrives with model 1; Aggressive

Setup

- Use the Gym 2 table; the map and the terrain list say what each piece counts as (chapter 12).
- Roll for conditions (chapter 12).
- Defences 1: set up two pieces of low wall or sandbags, each within 6" of an objective.
- Defences 2: place a turret within 2" of each objective, on Overwatch.
- The Republic deploys every model within 6" of an objective. The droids start off the table.
- The clock starts at 0. There is no alert track and no Unaware enemy: the alarm has sounded.

Terrain

No walls or doors. The mesa and the central ridge are raised ground, one level (3") high; the rock shelf at the mesa's east end is two levels. Climbing any sheer face costs 2" per level (chapter 12).

Special rules

Objectives. An objective is lost at the end of a round in which an enemy model is in base contact with it and no standing Republic model is within 3" of it. A Republic model retakes a lost objective the same way: in base contact at the end of a round, with no standing enemy model within 3".

The first wave. At the end of round 1, place models 1–6 at EE as marked, Alerted, with the marker on the nearest objective still held (the stores, to begin with). They activate from round 2. The droidekas use the Aggressive card instead of Sentry, as every Sentry, Cowed or Saboteur attacker does in a defence.

Waves. The clock is a small mission's: at the end of each round, roll a d4 and add that many minutes. When the clock reaches or passes a check-in (10 and 15 minutes), roll a d6 on the Separatist tier 2 contact table, rerolling a 1: 2–3 B1 section, 4 B2 squad, 5 droideka pair (Aggressive), 6 tactical droid and escort. That element arrives at EE at the end of that round, Alerted, the marker on the nearest objective still held. Number its models on from the last.

The enemy. Run the droids with chapter 10 and the behavior cards. Their objective, for tie-breakers, is the nearest objective still held. There is no alert track to raise.

Turrets. Each turret is a Republic model (Sentry Turret profile, Automated) that cannot move. It may stay on Overwatch every round. Count turrets when checking whether a standing Republic model is within 3" of an objective.

Getting onto the mesa. The mesa is one level up. Climbing a sheer face costs 2" (chapter 12); the west slope beside the spire field (T9) is open ground. Ahsoka's Leap ignores the climb. A droideka cannot roll up or down a level (Rolling): it walks instead.

Victory

Length: Until the clock reaches 20 minutes, or the attack breaks. **Goal:** Hold both objectives.

Decisive: Both objectives held when time runs out or the attack breaks, and no Republic model Dead.
Marginal: At least one objective held.
Failure: Both objectives lost, or the Republic force breaks.

The enemy

Run the enemy with chapter 10 and the behavior cards: read each list top-down and take the first line that applies.

Element	Models	Behavior	Drill
B1 battle droid section	1, 2, 3, 4	Battle droid	No drill
Droideka pair	5, 6	Aggressive	Fire and manoeuvre

Watch for, and log afterwards

- Clock: how many rounds did 20 minutes on a d4 give, and did the waves at 10 and 15 arrive at a sensible time?
- Was the first wave plus two waves the right pressure for a defended squad? Note the score at each check-in.
- Objectives: did the 3" rule for losing and retaking an objective need a judgment call?
- Sandbags and turrets: were they worth 4 and 6 Requisition? Did the turrets matter, or die at once?
- Aggressive droidekas: did they push the objectives in a believable way, or just roll into the guns?
- Should turrets count as standing models for holding an objective? Log any round it decided the result.
- Second game: play with Defences 3 (early warning): the first wave arrives at the end of round 2. Did it change the grade?

Log the game on the playtest feedback form.
