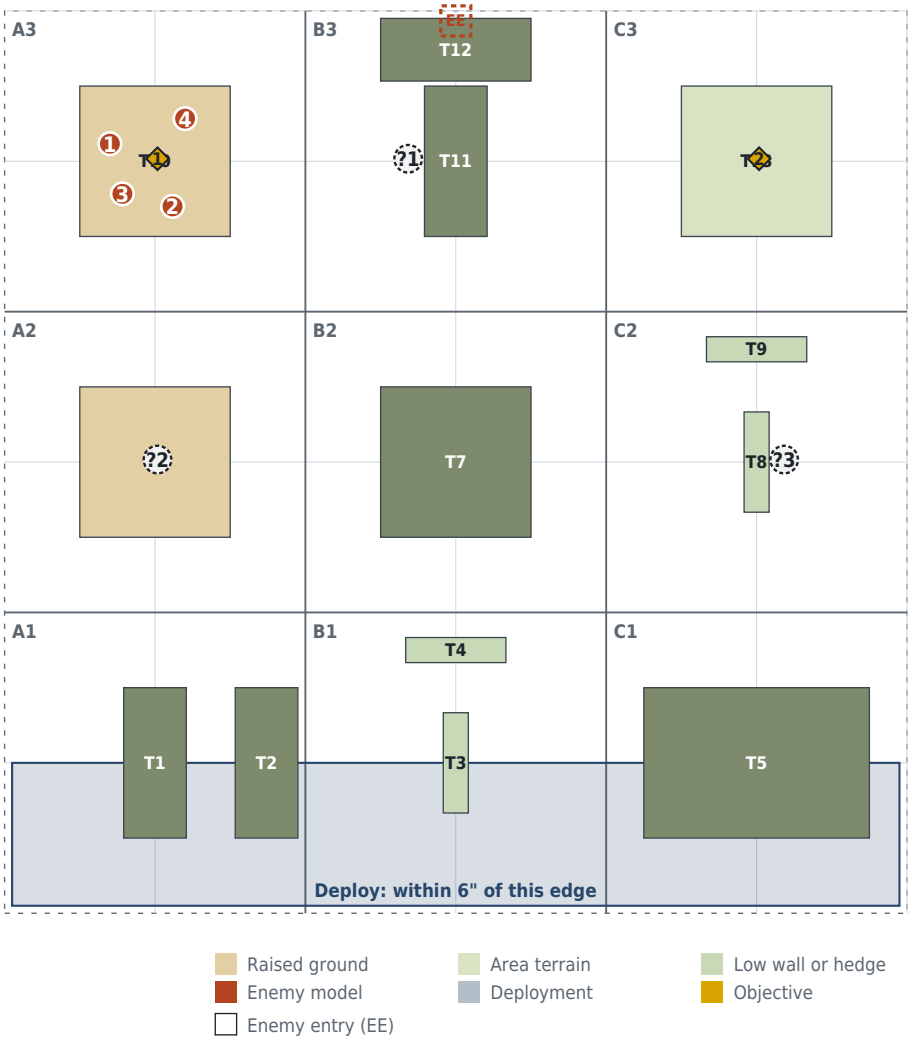
Foundry Moon 1: Lights Out at Refinery Nine

Imperator Black short arc · Foundry Moon · mission 1 of 3 · rules v0.5 · land · Separatist Alliance, threat tier 1 · solo

Tasking. Sabotage. Destroy the two uplink masts and get out.

Situation. Refinery Nine is the outermost station of the droid foundry on Ordo Kessa. Its two uplink masts tie it into the defence grid that guards the landing fields. A B1 section stands watch at the west mast; more droids work the yards. Knock both masts out before dawn and the gunships can land.



Each grid square is 6"; heavier lines mark the 12" sectors (A1 bottom left). Board 36" × 36". The Republic enters from the bottom edge. Pieces are footprints from the sector rolls: build the yard from your industrial terrain to match. Put a tall piece (a mast, pylon or antenna) at each objective. Contact chips (?n) are hidden contacts.

Objective. The uplink masts in sector A3 (west) and sector C3 (east). A model in base contact sets a charge with an Interact (models without breaching charges use the mast's own maintenance panel: same Interact). The mast is destroyed at the end of that round (Very loud), unless an enemy model is in base contact with it then, which disarms the charge.

Opposition. Separatist Alliance, threat tier 1. Guard (known): B1 battle droid section (4 models), at the west mast, Unaware. Contacts (unknown): 3 chips.

Ground. Industrial, 36" × 36" table (3 × 3 sectors), from RJ's industrial terrain. Conditions: Night: Darkness (chapter 8): models are seen only within 12".

Complication. None.

Extraction and time. Out by the Republic's own edge. Enemy entry and exit: middle of the far edge. Small mission: 20 minutes, clock die d4. Check-ins every 5 minutes from minute 10. Alert track starts at 0.

Force. Republic: up to 250 TV and 6 models from the roster (chapter 14, short arcs).

Sabotage

Taking it. A model in base contact sets a charge with an Interact (models without breaching charges use the target's own systems: same Interact). The target is destroyed at the end of that round (Very loud), unless an enemy model is in base contact with it then, which disarms the charge.

Lockdown (alert 6). The enemy guards the targets: place one new contact within 3" of each target still standing.

Grade	Result
Decisive	Both targets destroyed and the force extracted with no player model Dead.
Marginal	One target destroyed and the force extracted.
Failure	No target destroyed, or the force breaks.

After the mission

Grade	Next
Decisive	Mission 2A, Kraken's Convoy. The grid is down and the landing is clean: the Republic wins initiative in round 1 of 2A.
Marginal	Mission 2A, Kraken's Convoy. The grid is down, but the droids know a raid came: 2A's alert track starts at 1.
Failure	Mission 2B, Bring Them Home. The grid stays up and shoots down the gunship bringing the second wave.

Special rules

Droids at night. The B1s start Unaware, busy at the masts: only turrets and drones start Alerted (chapter 10). Night limits sight to 12", for them as for the clones.

The tactical droid. If a contact turns out to be the tactical droid and its escort, every Separatist element within 12" of it, in its sight, uses the Tactical profile (Battle computer). Put it down first.

Alert track and clock

Raises: Loud noise (chapter 10) +1; Very loud noise +2; An element raises the alarm +1; Each check-in the clock reaches or passes (a check-in is missed) +1. Starts at 0.

At 2: Contacts move: at the end of each round, every contact moves 6" toward the marker (or toward the player entry if there is no marker), by the shortest route. Unrevealed elements become Alerted when revealed.

At 4: Reinforcements: at the end of the round, the tier's reinforcement element arrives at the enemy's entry, Alerted.

At 6: Lockdown: the mission type's lockdown happens at the end of the round.

Clock: 20 minutes, clock die d4. At the end of each round roll the clock die: that many minutes pass; then resolve the alert track. Check-ins at minute 10 and every 5 after: each one reached or passed raises the alert by 1. Time runs out at the limit: the mission ends.

Contacts (threat tier 1)

1. A contact is revealed when a player model can see it, or ends a Move within 3" of it. Roll on the tier's contact table.
2. Place the element with its first model on the chip and the rest within 2", in cover where they can be; then remove the chip.
3. A revealed element is Unaware while the alert track is below 2, Alerted from 2 on. Either way, newly placed models cannot react until the current activation ends.
4. A contact that moves into sight of a player model is revealed at once.

d6	Contact	Models	Behavior
1	False alarm	Nothing there: crew who fled, a ventilation fan, a stray animal. Remove the chip.	—
