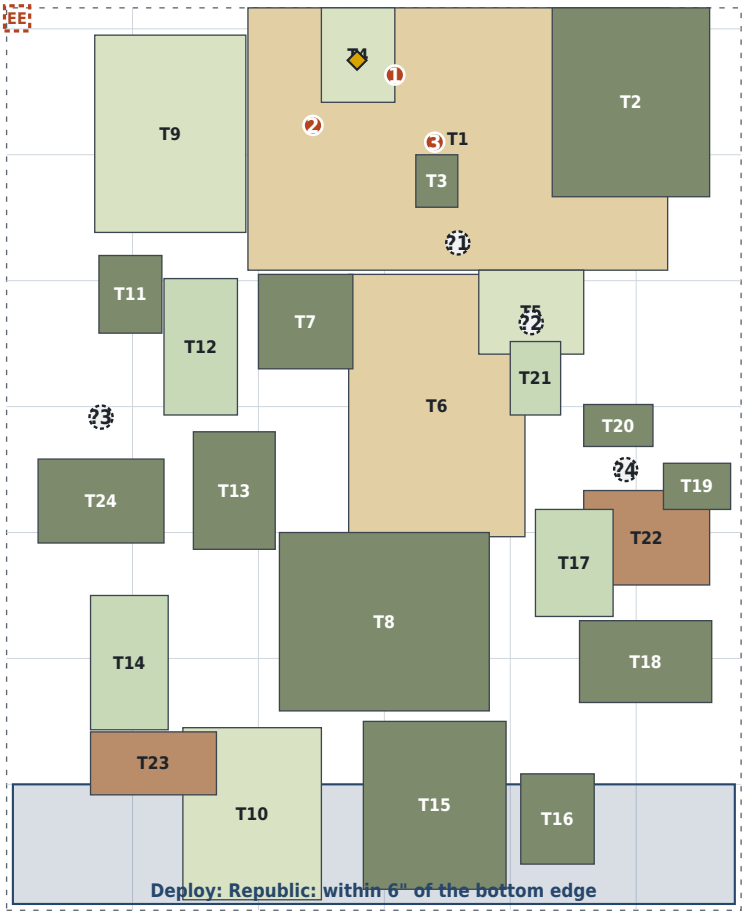
Foundry Moon 2B: Bring Them Home

Imperator Black short arc · Foundry Moon · mission 2B of 3 · rules v0.5 · land · Separatist Alliance, threat tier 2 · solo

Tasking. Recover personnel: the gunship's pilot.

Situation. The grid stayed up. It caught the gunship bringing the second wave over the spire flats; the gunship came down hard, and droids have dragged its pilot to the relay post on the mesa for a tactical droid to question. The rest of the crew are dead or scattered. Get the pilot back before the droids move them to the foundry.



Raised ground · Area terrain · Crater or trench · Low wall or hedge
Solid or building · Enemy model · Deployment · Objective
Contact chip (?n) · Enemy entry (EE)

Each grid square is 6". RJ's 35" × 43" desert table, played lengthwise, as in Gym 2: the Republic enters from the bottom edge, the mesa is at the top. The mesa and central ridge are one level up (sheer sides; the mesa's west slope beside the spire field is open ground); the rock shelf is two levels. Enemy positions are model centres.

Objective. The pilot, bound in the netted tent on the mesa (T4). The hostage (unit card: Hostage) starts bound. A player model in base contact frees them with an Interact. From then on the hostage is a player model: it activates after the model that freed it, every round, and must end each activation within 3" of a player model if it can.

Opposition. Separatist Alliance, threat tier 2. Guard (known): a tactical droid and two B1s, at the tent, Unaware. Contacts (unknown): 4 chips. Reinforcements: a B2 squad.

Ground. RJ's desert table (Gym 2), with the gunship wreck in the west flats. Conditions: roll (chapter 12).

Complication. None.

Extraction and time. Out by the Republic's own edge. Enemy entry and exit: the north-west corner. Small mission: 20 minutes, clock die d4. Check-ins every 5 minutes from minute 10. Alert track starts at 0.

Force. Republic: up to 300 TV and 7 models from the soldiers fit for duty (chapter 14, short arcs).

Recover personnel

Taking it. The hostage (unit card: Hostage) starts bound in the objective. A player model in base contact frees them with an Interact. From then on the hostage is a player model: it activates after the model that freed it, every round, and must end each activation within 3" of a player model if it can.

Lockdown (alert 6). The enemy moves the hostage: at the end of the round, the nearest enemy model within 6" of a bound hostage moves it up to 6" toward the enemy's exit, with it.

Grade	Result
Decisive	Hostage extracted alive and no player model Dead.
Marginal	Hostage extracted alive.
Failure	Hostage Dead, still held, or not extracted when time runs out.

After the mission

Grade	Next
Decisive	Mission 3, The Foundry Ship. The pilot flies the surviving gunship: mission 3's force limit is 50 TV higher, and the Republic wins initiative in round 1.
Marginal	Mission 3, The Foundry Ship. The pilot flies the surviving gunship: mission 3's force limit is 50 TV higher.
Failure	Mission 3, The Foundry Ship. No gunship and no pilot: mission 3's force limit is 50 TV lower, and its alert track starts 1 higher.

Special rules

The pilot. The hostage is a clone pilot (unit card: Hostage), bound in the netted tent (T4). A dead pilot is a Failure.
Battle computer. While the tactical droid stands, Separatist elements within 12" of it and in its sight use the Tactical profile with the Regular drill.
The wreck. A Republic model that ends a Move in base contact with the gunship wreck may Interact to take a thermal detonator from the gunship's stores (once per model).
Getting onto the mesa. The mesa is one level up. Climbing a sheer face costs 2" (chapter 12); the west slope beside the spire field (T9) is open ground. A Leap ignores the climb.

Alert track and clock

Raises: Loud noise (chapter 10) +1; Very loud noise +2; An element raises the alarm +1; Each check-in the clock reaches or passes (a check-in is missed) +1. Starts at 0.

At 2: Contacts move: at the end of each round, every contact moves 6" toward the marker (or toward the player entry if there is no marker), by the shortest route. Unrevealed elements become Alerted when revealed.
At 4: Reinforcements: at the end of the round, the tier's reinforcement element arrives at the enemy's entry, Alerted.
At 6: Lockdown: the mission type's lockdown happens at the end of the round.

Clock: 20 minutes, clock die d4. At the end of each round roll the clock die: that many minutes pass; then resolve the alert track. Check-ins at minute 10 and every 5 after: each one reached or passed raises the alert by 1. Time runs out at the limit: the mission ends.

Contacts (threat tier 2)

1. A contact is revealed when a player model can see it, or ends a Move within 3" of it. Roll on the tier's contact table.
2. Place the element with its first model on the chip and the rest within 2", in cover where they can be; then remove the chip.
3. A revealed element is Unaware while the alert track is below 2, Alerted from 2 on. Either way, newly placed models cannot react until the current activation ends.
4. A contact that moves into sight of a player model is revealed at once.
