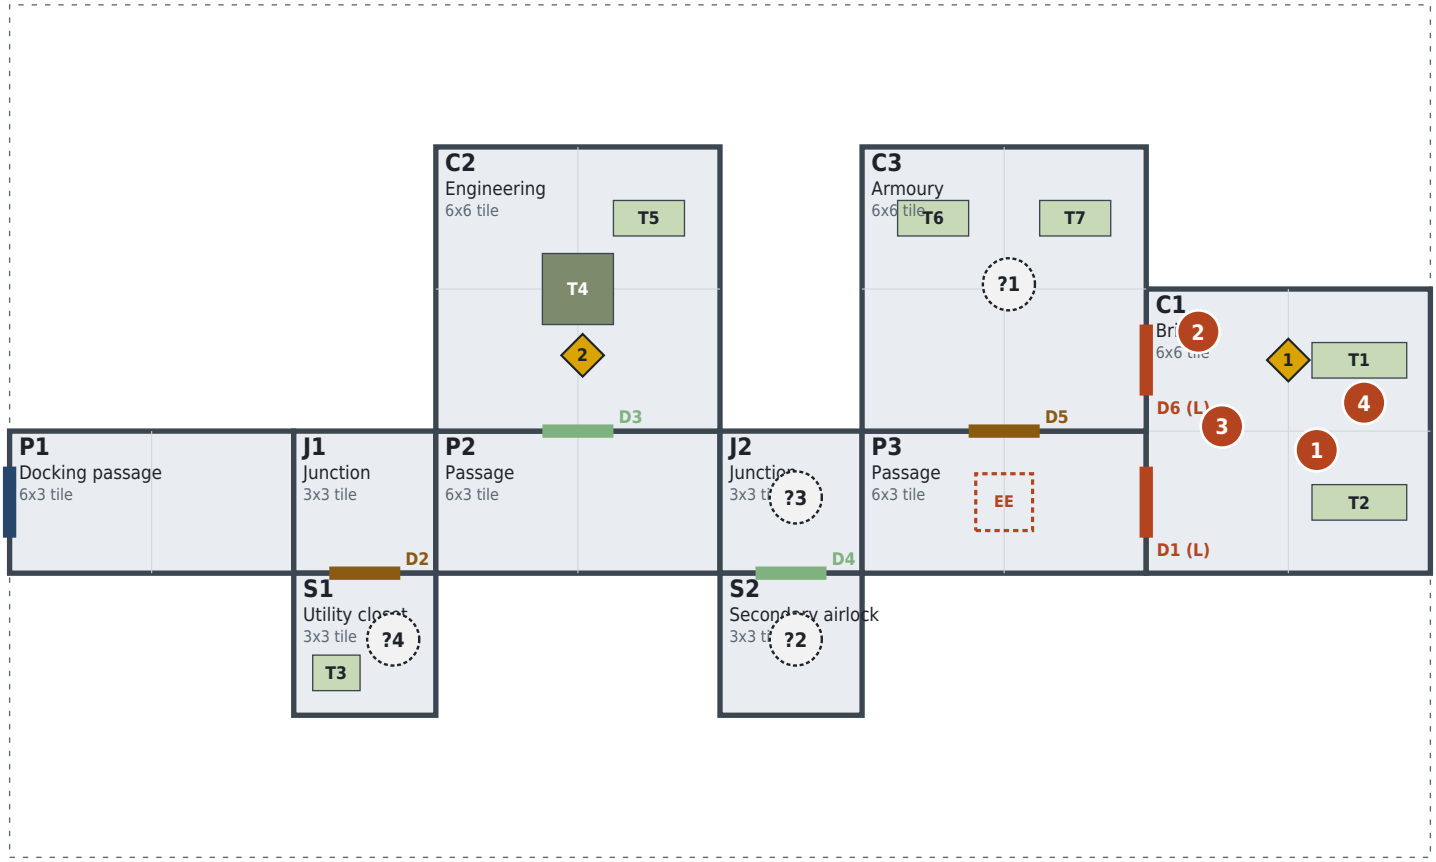
Foundry Moon 3: The Foundry Ship

Imperator Black short arc · Foundry Moon · mission 3 of 3 (finale) · rules v0.5 · aboard ship · Separatist Alliance, threat tier 3 · solo

Tasking. Sabotage. Destroy the bridge and engineering, and get out.

Situation. The foundry's output is loading aboard the frigate Iron Covenant on the landing field: a battalion of droids, racked and powered down. Board the frigate's command deck, destroy the bridge and engineering so it never lifts, and get out. General Grievous is aboard to see the shipment off.



Scale: each grid square is 3". Board 30" × 18". The blue bar is the airlock: the way in and out. Enemy models (numbered) are the guard, placed openly. Contact chips (?n) are hidden contacts: roll for them when revealed.

Objective. The bridge (C1) and engineering (C2). A model in base contact sets a charge with an Interact (models without breaching charges use the room's own systems: same Interact). The target is destroyed at the end of that round (Very loud), unless an enemy model is in base contact with it then, which disarms the charge.

Opposition. Separatist Alliance, threat tier 3. Guard (known): B1 battle droid section (4 models), on the bridge, Unaware. Contacts (unknown): 4 chips. Reinforcements: General Grievous and two MagnaGuards.

Ground. The frigate's command deck (corvette layout, deck 8). Hazard: every outer wall is hull: a breaching charge or frag that damages it causes decompression (chapter 8). The droids are sealed; clones in clone armour are too.

Complication. Early warning: the alert track starts at 1 (2 if Kraken escaped in 2A, or the pilot was lost in 2B).

Extraction and time. Out by the airlock (P1). Enemy entry and exit: P3. Second enemy exit: secondary airlock (S2). Small mission: 20 minutes, clock die d4. Check-ins every 5 minutes from minute 10.

Force. Republic: up to 350 TV and 8 models from the soldiers fit for duty (chapter 14, short arcs); 400 or 300 TV after 2B.

Sabotage

Taking it. A model in base contact sets a charge with an Interact (models without breaching charges use the target's own systems: same Interact). The target is destroyed at the end of that round (Very loud), unless an enemy model is in base contact with it then, which disarms the charge.

Lockdown (alert 6). The enemy guards the targets: place one new contact within 3" of each target still standing.

Grade	Result
Decisive	Both targets destroyed and the force extracted with no player model Dead.
Marginal	One target destroyed and the force extracted.
Failure	No target destroyed, or the force breaks.

After the mission

Grade	Next
Decisive	The frigate never lifts, and the foundry's next battalion with it. Work out the arc's result (chapter 14, short arcs).
Marginal	The frigate is crippled but repairable: the shipment is weeks late. Work out the arc's result.
Failure	The Iron Covenant lifts with its battalion. Work out the arc's result.

Special rules

From mission 2. 2A Decisive: remove two contact chips of your choice before play; Marginal: remove one. 2A Failure: alert starts 1 higher. 2B Decisive: +50 TV and the Republic wins initiative in round 1; Marginal: +50 TV; Failure: -50 TV and alert starts 1 higher.

General Grievous. At alert 4, Grievous and two MagnaGuards arrive at the enemy entry (P3), Alerted, Aggressive. Grievous is a Leader: his MagnaGuards fight with the Elite drill anyway.

Grievous withdraws. When Grievous is Wounded, or has 2 or more Suppression, he uses the Handler profile's escape line from then on, toward the nearest enemy exit (P3 or S2). If he leaves the board, he escapes to fight another day.

The racked droids. The droids in the holds are powered down and play no part, unless the alert track reaches 6: then the lockdown also places one B1 battle droid section at the enemy entry, Alerted.

Alert track and clock

Raises: Loud noise (chapter 10) +1; Very loud noise +2; An element raises the alarm +1; Each check-in the clock reaches or passes (a check-in is missed) +1. Starts at 1.

At 2: Contacts move: at the end of each round, every contact moves 6" toward the marker (or toward the player entry if there is no marker), by the shortest route. Unrevealed elements become Alerted when revealed.

At 4: Reinforcements: at the end of the round, the tier's reinforcement element arrives at the enemy's entry, Alerted.

At 6: Lockdown: the mission type's lockdown happens at the end of the round.

Clock: 20 minutes, clock die d4. At the end of each round roll the clock die: that many minutes pass; then resolve the alert track. Check-ins at minute 10 and every 5 after: each one reached or passed raises the alert by 1. Time runs out at the limit: the mission ends.

Contacts (threat tier 3)

1. A contact is revealed when a player model can see it, or ends a Move within 3" of it. Roll on the tier's contact table.
2. Place the element with its first model on the chip and the rest within 2", in cover where they can be; then remove the chip.
3. A revealed element is Unaware while the alert track is below 2, Alerted from 2 on. Either way, newly placed models cannot react until the current activation ends.
4. A contact that moves into sight of a player model is revealed at once.

d6	Contact	Models	Behavior
1	Booby trap	A tripwire charge: resolve a frag grenade centred on the chip (2d8, radius 2"). It is Very loud. Remove the chip.	—
