Campaign status

Campaign: _____ Force: _____ Arc: ___
Force selection (chapter 14): ☐ by fireteam (default) ☐ by soldier
Imperator Black · chapter 14 (draft) · in a dry-erase sleeve or in pencil.

Campaign turn (an arc lasts 8)

1	2	3	4	5	6	7	8

Standing

0	1	2	3	4	5	6
Recalled · income 0	Under review · income 1	Doubted · income 2	Trusted · income 3	Valued · income 3 · support 1	Favoured · income 4 · support 1	Command's own · income 4 · support 2

Requisition [ ]

Intel

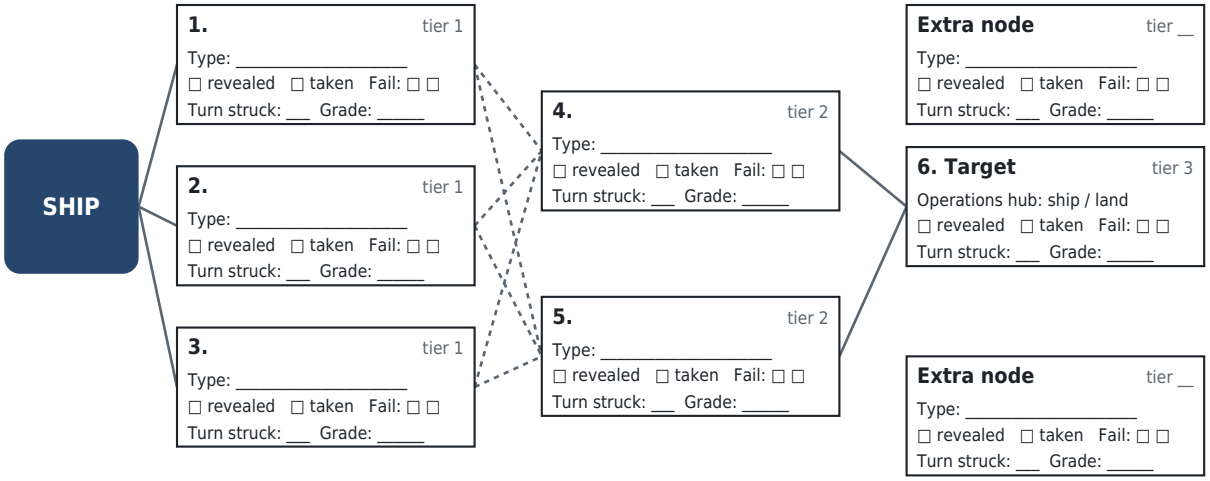
0	1	2	3	4	5	6

Evidence

0	1	2	3	4	5	6

Evidence at 6: the Directorate is exposed (next arc against it).

Arc map



Dashed: possible links. Ink the ones the dice give.
Extra nodes: holding sites, opportunities.

The ship

Medical bay	☐ **1** (4): Out-of-action times are 1 turn shorter (0 at least).	☐ **2** (6): +1 to injury rolls.	☐ **3** (8): Once per turn, re-roll one injury roll.
Armoury	☐ **1** (4): Each mission, one soldier may carry one extra gear item from the gear list.	☐ **2** (6): Each mission, one soldier may swap its weapon for an LMG, DMR or AT launcher.	☐ **3** (8): Both of the above for two soldiers each mission.
Intelligence cell	☐ **1** (4): +1 Intel after each mission graded Decisive or Marginal.	☐ **2** (6): One Intel use each mission is free.	☐ **3** (8): At the start of each turn, reveal one hidden node.

Each turn: **1. Tasking** · **2. Preparation** · **3. Mission** · **4. After-action** · **5. Upkeep** · **6. Events**

Force roster

Up to 12 soldiers. An advance every 5 XP. Out: turns still to miss (tick down at Upkeep).

Name	Troop and fireteam	Rank	XP	Advances taken	Cit.	Injuries	Out	Notes

Unit honours

Team	Marks (3 for an honour)	Honour

Breachers: +1 to the team's tests to set charges and open or force doors. · **Ghosts:** The first Loud noise the team makes in a mission does not raise the alert track. · **Steady:** +1 to the team's breaking tests. · **Hunters:** +1 to hit Unaware models.

Roll of honour

Name	Turn	Where

Medals and prisoners

Name	Medal / prisoner taken	Turn

Campaign reference

Node table

d6	Node	Board	Mission	Reward when taken
1	Salvage yard	Salvage tender	Seize data or cargo	+2 Requisition.
2	Freight run	Freighter / ore hauler	Seize data or cargo	+1 Requisition and +1 Intel.
3	Relay station	Station module	Sabotage	Reveal every node on the map; +1 Intel.
4	Safe house	Urban (land)	Capture a high-value target	+1 Intel and +1 Evidence.
5	Patrol corvette	Corvette / patrol craft	Capture a high-value target	+1 Standing.
6	Forward depot	Industrial (land)	Sabotage	+2 Requisition; the next mission's threat tier is 1 lower (1 at least).
—	Operations hub	Roll a die: 1–3 ship (station module), 4–6 land (fortified position).	Capture a high-value target	The arc is won (see the end of the arc).
—	Holding site	As the node where the soldier was captured.	Recover personnel	The soldier comes home: roll for injury, +1.

Map

1. Draw the ship on the left, then three node boxes in a column, two in the next and the target on the right. Number them 1 to 6, top to bottom, left to right; the target is node 6.
2. Link the ship to nodes 1, 2 and 3. Link nodes 4 and 5 to the target.
3. For each of nodes 1, 2 and 3 roll a die: 1–3 link it to node 4, 4–5 to node 5, 6 to both. If node 4 or 5 has no link from the left, link it to the nearest node in column 1.
4. Roll each of nodes 1–5 on the node table; the target is an operations hub. Column 1 is threat tier 1, column 2 tier 2, the target tier 3.
5. Nodes 1–3 are revealed. Nodes 4, 5 and the target are hidden: mark them '?' and keep their rolls face down (or roll when revealed). A node is revealed when a node linked to it is taken, or for 1 Intel.

• A node is taken when its mission is graded Decisive or Marginal. Collect the node's reward.
• A Failure leaves the node standing; its threat tier rises by 1 (to 4 at most). It may be struck again.
• A node can be struck if it is revealed and linked to the ship or to a taken node.
• The arc is won when the target is taken: Decisive if its mission was Decisive, otherwise Marginal. Gain 2 Evidence and 1 Standing.
• The arc is lost if the turn marker passes the last turn: the network relocates. Lose 1 Standing. Evidence stays.
• Between arcs: soldiers keep XP, advances, injuries and recovery; resources carry over; generate a new map. A campaign is usually one to three arcs.

After-action rewards

Result	Reward
Decisive	+3 Requisition, +1 Standing. The node is taken.
Marginal	+1 Requisition. The node is taken.
Failure	−1 Standing. The node stands, its threat tier 1 higher (4 at most).
HVT extracted as a prisoner	+2 Intel and +1 Evidence.
Each other prisoner extracted	+1 Intel (2 at most per mission).
Data seized (seize mission)	+1 Intel; +1 Evidence as well at threat tier 3 or 4.
Two or more soldiers Dead	−1 Standing.

Casualties and injuries

• Dead: the soldier's name goes on the force's roll of honour.
• Down at any point in the mission, and alive at the end: roll on the injury table.
• Left behind Down: captured. A holding site node joins the map, linked to the node where it happened, at the same threat tier, revealed. Strike it to bring the soldier home.
• Left behind standing: the soldier makes their own way back and is out for 1 turn.
• Wounded markers alone leave no lasting injury.

2d6	Injury	Effect
2	Dies of wounds	The soldier dies. Roll of honour.
3	Crippled	Permanently −1 to an attribute: roll a die, 1 Move (−1"), 2 Shoot, 3 Fight, 4 Physique, 5 Nerve, 6 Tech (0 at least). Out 3 turns.
4-5	Severe wound	Out 2 turns.
6-8	Wounded	Out 1 turn.
9-10	Patched up	Fit for the next mission.
11-12	Close call	Fit for the next mission, and +1 XP.

Modifiers: -1 the soldier was Bleeding or Critical during the mission; +1 a Medic action saved or treated the soldier during the mission (chapter 7); +1 medical bay level 2 or 3. 2 or less reads as 2; 12 or more as 12.

XP per mission

XP	For
+1	Deployed on the mission
+1	Did the objective's action: took it, freed the hostage, set a charge that destroyed a target, or took the HVT
+1	Put one or more enemy models Down or worse, or made one surrender
+1	The mission was graded Decisive
+1	The citation: one soldier per mission, your pick, for the deed of the mission (record it)

Advance (every 5 XP)

d6	Advance
1	+1 Shoot (4 at most; 4 is legendary)
2	+1 Fight (4 at most)
3	+1 Physique (3 at most)
4	+1 Nerve (4 at most)
5	+1 Tech (3 at most), or +1" Move (once per soldier)
6	A skill: Leader, Medic, Marksman (next level), Scout or Low-light; or choose any row above

Rank follows advances: a Regular becomes a Veteran at 3 advances and an Elite at 6 (a Green soldier becomes Regular at 1). Rank is a label (chapter 1).

Events (2d6, end of each turn)

2d6	Event	Effect
2	Leak	The enemy knows you are coming: the target's threat tier is 1 higher (4 at most).
3	Supply shortfall	Lose 2 Requisition (0 at least).
4	Enemy reinforces	The next mission's threat tier is 1 higher (4 at most).
5	Questions from command	Lose 1 Standing, unless you spend 2 Requisition.
6	Downtime	One recovering soldier is fit a turn sooner.
7	Quiet	Nothing happens.
8	Informant	+1 Intel.
9	Supply drop	+2 Requisition.
10	Volunteers	One free Regular replacement for an empty slot in one of the force's fireteams (any troop the force fields, if picking by soldier), if the roster has room.
11	Opportunity	A new node joins the map: roll its type; threat tier 1; linked to the ship or to any taken node; revealed.
12	Commendation	+1 Standing.

Intel and support

Cost	Intel use	Effect
1	Reveal a node	A hidden node shows its type.
1	Their pattern	The first check-in comes at minute 15, not 10.
1	Eyes on a contact	At setup, roll one contact chip's result and place that element openly, Unaware.
1	Re-roll the complication	Roll the mission's complication again; the second roll stands.

Support asset	Effect
Insertion window	The mission clock's time limit is 5 minutes longer.
Signals cover	The first check-in does not raise the alert track.
Attached trooper	One extra Regular soldier from the force's teams deploys on loan. Injuries apply to it, but it gains no XP and returns to command after the mission.
Intel package	1 Intel to spend on this mission only.

Requisition

Item	Cost
Replacement soldier (0 XP): by fireteam, a troop that fills an empty slot in its fireteam; by soldier, any troop the force fields	Its Requisition (chapter 15)
New fireteam (a standard fireteam, or one built to its type, chapter 9), at least half its slots and its Leader	Its soldiers' Requisition
Fast-track recovery: one recovering soldier is fit a turn sooner	2
Ship upgrade	4 / 6 / 8 by level

A soldier's Requisition is its Troop Value ÷ 10, rounded up (chapter 15).
