Seize data or cargo

Mission card · objective and grades

Reach the objective, take what it holds, and get it out.

Taking it

A model in base contact may Interact to take it: automatic for a model with a hacking rig (data) or Physique 2 or more (cargo); 2d6 + Tech (data) or Physique (cargo), 8+, for anyone else. Data travels with the model that copied it; cargo is carried, and the carrier has −2" Move. If the carrier goes Down, a model in base contact may take it with an Interact.

Lockdown (alert 6)

The enemy locks it down: taking the objective now needs two successful Interacts, and a Hack of Secured (9+) first if it is data.

Grades

Decisive: Objective extracted and no player model Dead.
Marginal: Objective extracted.
Failure: Objective not extracted when time runs out.

Alert and clock

Mission card · the pressure

Raises

- Loud noise (chapter 10): +1
- Very loud noise: +2
- An element raises the alarm: +1
- Each check-in the clock reaches or passes (a check-in is missed): +1

Thresholds (once each)

2: Contacts move: at the end of each round, every contact moves 6" toward the marker (or toward the player entry if there is no marker), by the shortest route. Unrevealed elements become Alerted when revealed.
4: Reinforcements: at the end of the round, the tier's reinforcement element arrives at the enemy's entry, Alerted.
6: Lockdown: the mission type's lockdown happens at the end of the round.

Mission clock

20 minutes, clock die d4. End of each round: roll it, move the clock, then resolve the alert track. Check-ins at 10 and every 5 minutes after.

Contacts

Mission card · threat tier 3

1. A contact is revealed when a player model can see it, or ends a Move within 3" of it. Roll on the tier's contact table.
2. Place the element with its first model on the chip and the rest within 2", in cover where they can be; then remove the chip.
3. A revealed element is Unaware while the alert track is below 2, Alerted from 2 on. Either way, newly placed models cannot react until the current activation ends.
4. A contact that moves into sight of a player model is revealed at once.

d6 (threat tier 3)

1: Booby trap
2: Collections enforcers (3 × Collections Enforcer)
3: Repossession team (3 × Repossession Breacher)
4: Liquidators (2 × Liquidator)
5: Borz Bratva team (2 × Borz Bratva Trooper, Borz Bratva HMG Gunner)
6: Harlow veterans (3 × Harlow Veteran)

Reinforcements: Contract reaction force (3 × Reaction Force Operator, Reaction Force Gunner).

Enemy awareness

Solo opponent reference 1 of 3

Awareness

Unaware: Busy with its work. Does not activate or react. Becomes Alerted when its element sees a player model, hears noise, is hit, or the alarm is raised.
Alerted: Knows something is wrong but has no target in sight. Activates using its profile's No target list, toward the marker.
Engaged: Any Alerted model that can see a standing player model when it activates or reacts. Uses its profile's Target in sight list.
At the start: Elements start Unaware unless the mission says otherwise. Elements with the Automated profile (turrets and drones), and models the mission places on Overwatch, start Alerted. Other Automated troops (battle droids, combat robots) start Unaware like anyone else: their sensors are cued to their task, not to the intruder.

Noise

Quiet (Moving, opening and closing doors, hacking, close combat, Silenced shots, smoke grenades): not heard.
Loud (Unsilenced shooting, forcing a door with a breaching tool): Elements with a model within 12" aboard ship, measured through walls; within 24" on land; alert +1.
Very loud (Frag grenades, flashbangs, breaching charges, any explosion): Every element on the board; alert +2.

The marker

• Place or move the marker to the source of the latest noise, or to where an enemy model last saw a player model.
• An Alerted model that ends a Move within 3" of the marker, seeing no player model, removes it. Its element then holds where it is.
• With no marker on the board, Alerted models hold: stay in cover facing the nearest approach and go on Overwatch.

The alarm

• When an element first sees a player model or is hit, it raises the alarm at the end of its next activation: every element on the board becomes Alerted, and the alert track rises by 1.
• If every model of the element is Down, Dead or has surrendered before then, the alarm is not raised.

Enemy turn

Solo opponent reference 2 of 3

Who activates next

1. A Leader with a friend within 6" that has 2 or more Suppression.
2. Engaged models in the open.
3. Other Engaged models, most Suppression first.
4. Alerted models, nearest the marker first.
5. Unaware models do not activate.

Targets

1. Ignore Down, Dead and surrendered models unless nothing else is in sight.
2. A player model it can hit without a cover penalty, nearest first.
3. Otherwise the player model in the least cover, nearest first.
4. Auto weapons spread to every other player model they can engage.

Moving

• To cover: the nearest position in cover within the Move, Heavy before Light. If the line says "with a target", it must still see one; otherwise it ends out of sight of every player model if it can.
• Toward the marker or a target: by the shortest route (through doors aboard ship or in buildings; on land, from cover to cover where the route allows), ending in cover if it can. Enemy models open locked doors on their own vessel or ground with an Interact.
• Away: by the shortest route out of sight of every player model, ending in cover.

Surrender

• A model whose profile allows it tests when it activates Pinned or Wounded with a player model within 6" in its line of sight: 2d6 + Nerve, 8+, or it surrenders.
• A surrendered model lies down, takes no actions, cannot react and is not a target. It is a prisoner if the mission allows it.

Tie-breakers

1. The option nearest the enemy's objective, or the marker if there is no objective.
2. The lowest-numbered enemy model, or the player model nearest the enemy's objective.
3. Roll a die.

Terms

Area: Where a model is: a compartment, passage or junction aboard ship; on land, a building, a terrain piece, or the open ground between them.
Approach: A way an enemy can come into a model's area: a door aboard ship; a door or window of a building; on land, the side of the model's cover that faces the marker.
Exit: The entry point the mission gives the enemy, a secondary airlock or escape pod aboard ship, or the enemy's board edge on land.

Drill and close quarters

Solo opponent reference 3 of 3

Drill: set by the element's lowest rank; a friendly Leader within 6" raises it one step.

Green, No drill: Each model follows its lists alone. Shoots instead of Aiming, never cracks doors, and throws grenades only where its list says.
Regular, Fire and manoeuvre: A model ends a Move in the open, in sight of a player model, only while a friend of its element covers it: on Overwatch, or Engaged with the same target. Otherwise it stops in the last cover on its route, or goes on Overwatch instead of moving. Charges are exempt.
Veteran, Bounding and grenades: As Regular, and: throws a frag at 2 or more player models within its explosion radius, with no friend in it; at a closed door (aboard ship or into a building) with the marker or a seen player model beyond, cracks and throws (flashbang first, else frag); the last model of the element to activate each round goes on Overwatch if it has no target.
Elite, Assault drill: As Veteran, and: focus fire, shooting the player model its element has already hit this round if it can see it; picks Leaders and Auto gunners first at each step of the target list.

Close quarters

Used first by an Engaged model with a player model within 6", unless its profile says otherwise. Read top-down.
1. Outnumbered (more standing player models than friends within 6" of it) and not Aggressive: Move away, then Shoot if it still has a target.
2. Fight 2 or more, a target within its Move, and Aggressive or Tactical: charge it (close combat).
3. Two or more player models within a frag's explosion radius of one point, no friend in it, and it carries frag: Throw it, then Move to cover.
4. Otherwise: use its profile's Target in sight list.

Sentry

Enemy behavior profile · proposed

Holds chokepoints, overwatches approaches, raises the alarm.
Used by: Asset security, Borz Bratva team, Droideka pair.

Player model within 6": close quarters first (reference card).

Target in sight (Engaged)

1. In the open: Move to cover with a target, then Shoot.
2. Auto weapon with a target in cover in sight: Suppressive Fire on it (and others within 3"), then Shoot.
3. A target within short range: Aim, then Shoot.
4. Otherwise: Shoot, then Overwatch.

No target (Alerted)

1. The investigator: Move toward the marker, twice.
2. Already in cover covering the approach to its area nearest the marker: Overwatch.
3. Others: Move to cover covering that approach, then Overwatch.

Investigates: One model: the lowest-numbered model without an Auto weapon. The rest hold.

Reactions

• Overwatch: Shoot at the first trigger it can.
• Unactivated: when shot at in the open, Move to cover.

Close combat

Breaks after a lost exchange if Wounded or with 2 or more Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

Aggressive

Enemy behavior profile · proposed

Closes distance, flanks through side passages, seeks close combat.
Used by: Collections enforcers, Repossession team, Contract reaction force, Borz Cyka team, Ubiytsa shock team, Harlow veterans, UN Pointmen, MagnaGuard pair, General Grievous and MagnaGuards.

Player model within 6": close quarters first (reference card).

Target in sight (Engaged)

1. Fight 2 or more and a target within its Move: charge it. (Fight 1 or less never charges: it closes and shoots.)
2. A target within short range: Shoot, Shoot.
3. Otherwise: Move toward the nearest target, then Shoot.

No target (Alerted)

1. Move toward the marker, twice. Prefer a route that does not pass through a door or open ground a player model can see (flanking).

Investigates: Every model.

Reactions

• Overwatch: Shoot at the first trigger it can.
• Unactivated: when a player model comes within short range in its sight, Shoot.

Close combat

Never breaks while it has fewer than 3 Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

Tactical

Enemy behavior profile · proposed

Fire and manoeuvre: one element fixes while another moves; uses Overwatch and grenades.

Used by: Liquidators, Contract boarding team, Harlow control team, Harlow engineers, UN reserve fireteam, Raid Force Alpha fireteam, Raid Force Alpha specialists, Directorate deniable operators, Tactical droid and escort, BX commando droid squad, Kraken and bodyguard.

Player model within 6": close quarters first (reference card).

Target in sight (Engaged)

1. In the open: Move to cover with a target, then Shoot.
2. No friend of its element is covering the target: Shoot, then Overwatch.
3. A friend is covering and the target is beyond short range: Move to cover closer to the target, out of its line of sight on the way if it can, then Shoot.
4. Otherwise: Aim, then Shoot.

No target (Alerted)

1. First of its element this round: Move toward the marker, then Overwatch.
2. Otherwise: Move to cover covering the friend ahead, then Overwatch.

Investigates: Every model, in bounds: the first model to activate Moves, the next covers it from Overwatch, alternating.

Reactions

• Overwatch: Shoot at the first trigger it can.
• Unactivated: when shot at in the open, Move to cover; when a player model comes within short range in its sight, Shoot.

Close combat

Breaks after a lost exchange if Wounded or with 2 or more Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.
