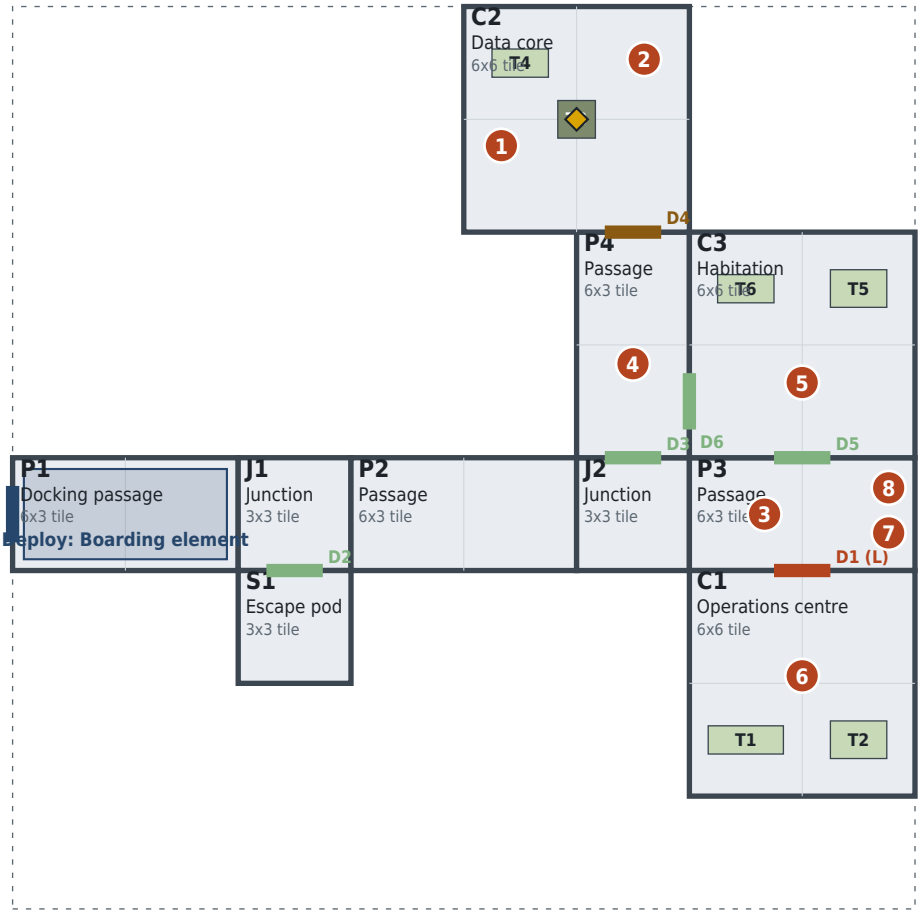
Gym 3: Wipe Race

Imperator Black gym scenario · rules v0.5 · solo · about 60–90 minutes

Freespace Solutions has taken a mining station's operations module under a debt claim, and its salvage techs are wiping the data core before anyone can read where the ore went. Manticor Borz contractors guard the module. A Task Force Boone boarding element has docked at the module's west airlock. Get to the core before the wipe finishes. The deck is chapter 11's station module, seed 11.



Open door · Closed door · Locked door (L) · Light cover
Heavy cover · Enemy model · Deployment · Objective

Scale: each grid square is 3". Board 24" × 24". The blue bar on the west wall of P1 is the airlock: the way in and out. Enemy positions are model centres.

Task Force Boone (6)

- VAT Team Leader (Team Leader)
- VAT Assaulter (Breacher)
- VAT Assaulter (Assaulter)
- VAT Gunner (Gunner)
- Data Specialist (Specialist)
- Pathfinder (Medic (attached))

Freespace Solutions and Contractors (8)

- 1. Salvage Tech (Sidearm): Unaware, at the core
- 2. Salvage Tech (Sidearm): Unaware, at the core
- 3. Borz Bratva Trooper (Rifle): Unaware
- 4. Borz Bratva Trooper (Rifle): Unaware
- 5. Borz Bratva HMG Gunner (HMG): Unaware
- 6. Recovery Captain (SMG): Unaware, in the operations centre
- 7. Borz Cyka Powered Trooper (LMG): Off board: arrives at the east end of P3 (see special rules)
- 8. Borz Cyka Bravo Breacher (SMG): Off board: arrives with model 7

Setup

- Tiles: three 6"×6", four 6"×3" (one stood on end as P4) and three 3"×3" (two junctions and the escape pod). Lay them as the map shows; the rest of the board is outside the hull.
- Doors as marked: D1 locked (Hardened), D4 closed, D2, D3, D5 and D6 open.
- Cover as marked; the Terrain table suggests pieces.
- Enemy models 1–6 on their marked positions. Models 7 and 8 start off the board.
- Task Force Boone deploys wholly inside the docking passage (P1).

Terrain

Walls: Kill Team / Boarding Actions bulkhead sections along the tile edges. Doors: hatchways from the same sets. D1 (operations centre) is locked, Hardened: 9+, two successes. The east end of passage P3 opens onto the rest of the station (off the board).

Map	Piece	Cover	Footprint	Suggested terrain
T1	Console bank	Light	2" × 0.75"	A bank of consoles.
T2	Plot table	Light	1.5" × 1"	A plotting table or holo-display.
T3	Core	Heavy	1" × 1"	A floor-to-ceiling data core column.
T4	Consoles	Light	1.5" × 0.75"	Access consoles.
T5	Furniture	Light	1.5" × 1"	Furniture, bunks or partitions.
T6	Lockers	Light	1.5" × 0.75"	Lockers.

Light cover: at least a third of the model hidden. Heavy cover: at least half hidden behind solid material. Exact pieces don't matter; keep the footprint and height close.

Special rules

Surprise. Task Force Boone wins initiative in round 1 automatically.

The enemy. Run the enemy with chapter 10 and the behavior cards. Models 1–6 start Unaware. The enemy's objective, for tie-breakers, is the data core. The recovery captain (6) never leaves the operations centre.

The wipe. The salvage techs (1, 2) are Saboteurs and their task is the data core. While Unaware they do nothing. Once Alerted, each Interact by a tech within 1" of the core adds 1 to the wipe track. At 6 the data is gone. Track it with yellow cubes beside the core.

Pull the data. A Task Force Boone model within 1" of the core may Interact to copy the data: automatic for the Data Specialist, 2d6 + Tech, 9+ for anyone else. It takes two successful Interacts, by any models, in any rounds. The data is secured once the second succeeds, if the wipe track is still below 6.

Contract reaction team. At the end of the round after the alarm is raised, place the Borz Cyka team (7, 8) at the east end of passage P3, Alerted. If P3's east end is blocked, place them as close to it as they can stand.

Escape pod. S1 is an escape pod (chapter 11): an enemy model that ends its activation in it leaves the board, as if fled.

Prisoner. If the recovery captain is captured (chapter 7) or surrenders, Task Force Boone takes it.

Victory

Length: 8 rounds. **Goal:** Secure the data before the wipe reaches 6.

Decisive: Data secured and no Task Force Boone model Dead. Bonus: recovery captain captured.
Marginal: Data secured, with one or more Task Force Boone models Dead.
Failure: The wipe reaches 6, the data is not secured by the end of round 8, or the boarding element breaks.

The enemy

Run the enemy with chapter 10 and the behavior cards: read each list top-down and take the first line that applies.

Element	Models	Behavior	Drill
Salvage techs	1, 2	Saboteur	Fire and manoeuvre; Bounding and grenades with model 6 within 6"
Borz Bratva team	3, 4, 5	Sentry	Fire and manoeuvre; Bounding and grenades with model 6 within 6"
Recovery captain	6	Leader	Bounding and grenades
Borz Cyka team	7, 8	Aggressive	Bounding and grenades; Assault drill with model 6 within 6"

Watch for, and log afterwards

- Was the generated station deck (chapter 11) a good fight? Anything you would change about how it was built?
- Did the Saboteur card make the wipe a real race once the alarm went up?
- Hardened lock on D1: worth hacking, breaching, or ignoring?
- Shield, Layered armour and the HMG: did the Borz feel tougher than Freespace security without being a wall?
- Task Force Boone at Shoot 2: still too many misses, or about right?
- Count judgment calls per round for the enemy.
