# Enemy awareness

Solo opponent reference 1 of 3

### Awareness

**Unaware:** Busy with its work. Does not activate or react. Becomes Alerted when its element sees a player model, hears noise, is hit, or the alarm is raised.
**Alerted:** Knows something is wrong but has no target in sight. Activates using its profile's No target list, toward the marker.
**Engaged:** Any Alerted model that can see a standing player model when it activates or reacts. Uses its profile's Target in sight list.
**At the start:** Elements start Unaware unless the mission says otherwise. Automated models, and models the mission places on Overwatch, start Alerted.

### Noise

**Quiet** (Moving, opening and closing doors, hacking, close combat, Silenced shots, smoke grenades): not heard.
**Loud** (Unsilenced shooting, forcing a door with a breaching tool): Elements with a model within 12" aboard ship, measured through walls; within 24" on land; alert +1.
**Very loud** (Frag grenades, flashbangs, breaching charges, any explosion): Every element on the board; alert +2.

### The marker

• Place or move the marker to the source of the latest noise, or to where an enemy model last saw a player model.
• An Alerted model that ends a Move within 3" of the marker, seeing no player model, removes it. Its element then holds where it is.
• With no marker on the board, Alerted models hold: stay in cover facing the nearest approach and go on Overwatch.

### The alarm

• When an element first sees a player model or is hit, it raises the alarm at the end of its next activation: every element on the board becomes Alerted, and the alert track rises by 1.
• If every model of the element is Down, Dead or has surrendered before then, the alarm is not raised.

# Enemy turn

Solo opponent reference 2 of 3

#### Who activates next

1. A Leader with a friend within 6" that has 2 or more Suppression.
2. Engaged models in the open.
3. Other Engaged models, most Suppression first.
4. Alerted models, nearest the marker first.
5. Unaware models do not activate.

#### Targets

1. Ignore Down, Dead and surrendered models unless nothing else is in sight.
2. A player model it can hit without a cover penalty, nearest first.
3. Otherwise the player model in the least cover, nearest first.
4. Auto weapons spread to every other player model they can engage.

#### Moving

• To cover: the nearest position in cover within the Move, Heavy before Light. If the line says "with a target", it must still see one; otherwise it ends out of sight of every player model if it can.
• Toward the marker or a target: by the shortest route (through doors aboard ship or in buildings; on land, from cover to cover where the route allows), ending in cover if it can. Enemy models open locked doors on their own vessel or ground with an Interact.
• Away: by the shortest route out of sight of every player model, ending in cover.

#### Surrender

• A model whose profile allows it tests when it activates Pinned or Wounded with a player model within 6" in its line of sight: 2d6 + Nerve, 8+, or it surrenders.
• A surrendered model lies down, takes no actions, cannot react and is not a target. It is a prisoner if the mission allows it.

#### Tie-breakers

1. The option nearest the enemy's objective, or the marker if there is no objective.
2. The lowest-numbered enemy model, or the player model nearest the enemy's objective.
3. Roll a die.

#### Terms

**Area:** Where a model is: a compartment, passage or junction aboard ship; on land, a building, a terrain piece, or the open ground between them.
**Approach:** A way an enemy can come into a model's area: a door aboard ship; a door or window of a building; on land, the side of the model's cover that faces the marker.
**Exit:** The entry point the mission gives the enemy, a secondary airlock or escape pod aboard ship, or the enemy's board edge on land.

# Drill and close quarters

Solo opponent reference 3 of 3

Drill: set by the element's lowest rank; a friendly Leader within 6" raises it one step.

**Green, No drill:** Each model follows its lists alone. Shoots instead of Aiming, never cracks doors, and throws grenades only where its list says.
**Regular, Fire and manoeuvre:** A model ends a Move in the open, in sight of a player model, only while a friend of its element covers it: on Overwatch, or Engaged with the same target. Otherwise it stops in the last cover on its route, or goes on Overwatch instead of moving. Charges are exempt.
**Veteran, Bounding and grenades:** As Regular, and: throws a frag at 2 or more player models within its blast radius, with no friend in it; at a closed door (aboard ship or into a building) with the marker or a seen player model beyond, cracks and throws (flashbang first, else frag); the last model of the element to activate each round goes on Overwatch if it has no target.
**Elite, Assault drill:** As Veteran, and: focus fire, shooting the player model its element has already hit this round if it can see it; picks Leaders and Auto gunners first at each step of the target list.

### Close quarters

Used first by an Engaged model with a player model within 6", unless its profile says otherwise. Read top-down.
1. Outnumbered (more standing player models than friends within 6" of it) and not Aggressive: Move away, then Shoot if it still has a target.
2. Fight 2 or more, a target within its Move, and Aggressive or Tactical: charge it (close combat).
3. Two or more player models within a frag's blast radius of one point, no friend in it, and it carries frag: Throw it, then Move to cover.
4. Otherwise: use its profile's Target in sight list.

# Cowed

Enemy behavior profile · proposed

*Holds its ground, falls back under Suppression, may surrender.*
Used by: Salvage crew.

### Target in sight (Engaged)

1. Pinned or Wounded, with a player model within 6" in sight: test to surrender, then carry on down the list if it passes.
2. In the open: Move to cover, then Move away.
3. Otherwise: Shoot, Shoot.

### No target (Alerted)

1. If it can see an approach toward the marker: Move away, out of sight of that approach.
2. Otherwise: stay put.

**Investigates:** None. Cowed models never move toward the marker.

### Reactions

• Unactivated: when shot at in the open, Move to cover.
• Never goes on Overwatch.

### Close combat

Breaks after any lost exchange. May surrender.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Sentry

Enemy behavior profile · proposed

*Holds chokepoints, overwatches approaches, raises the alarm.*
Used by: Asset security, Borz Bratva team.

**Player model within 6":** close quarters first (reference card).

**Target in sight (Engaged)**

1. In the open: Move to cover with a target, then Shoot.
2. Auto weapon with two or more targets in sight: Suppressive Fire, then Shoot.
3. A target within short range: Aim, then Shoot.
4. Otherwise: Shoot, then Overwatch.

**No target (Alerted)**

1. The investigator: Move toward the marker, twice.
2. Already in cover covering the approach to its area nearest the marker: Overwatch.
3. Others: Move to cover covering that approach, then Overwatch.

**Investigates:** One model: the lowest-numbered model without an Auto weapon. The rest hold.

**Reactions**

- Overwatch: Shoot at the first trigger it can.
- Unactivated: when shot at in the open, Move to cover.

**Close combat**

Breaks after a lost exchange if Wounded or with 2 or more Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Aggressive

Enemy behavior profile · proposed

*Closes distance, flanks through side passages, seeks close combat.*
Used by: Collections enforcers, Repossession team, Contract reaction force, Borz Cyka team, Ubiytsa shock team, Harlow veterans, UN Pointmen.

**Player model within 6":** close quarters first (reference card).

**Target in sight (Engaged)**

1. Fight 2 or more and a target within its Move: charge it.
2. A target within short range: Shoot, Shoot.
3. Otherwise: Move toward the nearest target, then Shoot.

**No target (Alerted)**

1. Move toward the marker, twice. Prefer a route that does not pass through a door or open ground a player model can see (flanking).

**Investigates:** Every model.

**Reactions**

- Overwatch: Shoot at the first trigger it can.
- Unactivated: when a player model comes within short range in its sight, Shoot.

**Close combat**

Never breaks while it has fewer than 3 Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Tactical

Enemy behavior profile · proposed

*Fire and manoeuvre: one element fixes while another moves; uses Overwatch and grenades.*
Used by: Liquidators, Contract boarding team, Harlow control team, Harlow engineers, UN reserve fireteam, Raid Force Alpha fireteam, Raid Force Alpha specialists, Directorate deniable operators.

**Player model within 6":** close quarters first (reference card).

**Target in sight (Engaged)**

1. In the open: Move to cover with a target, then Shoot.
2. No friend of its element is covering the target: Shoot, then Overwatch.
3. A friend is covering and the target is beyond short range: Move to cover closer to the target, out of its line of sight on the way if it can, then Shoot.
4. Otherwise: Aim, then Shoot.

**No target (Alerted)**

1. First of its element this round: Move toward the marker, then Overwatch.
2. Otherwise: Move to cover covering the friend ahead, then Overwatch.

**Investigates:** Every model, in bounds: the first model to activate Moves, the next covers it from Overwatch, alternating.

**Reactions**

- Overwatch: Shoot at the first trigger it can.
- Unactivated: when shot at in the open, Move to cover; when a player model comes within short range in its sight, Shoot.

**Close combat**

Breaks after a lost exchange if Wounded or with 2 or more Suppression.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Saboteur

Enemy behavior profile · proposed

*Avoids fights; works consoles, rigs charges, seals doors, destroys evidence.*
Used by: Salvage techs.

**Target in sight (Engaged)**

1. Pinned or Wounded, with a player model within 6" in sight: test to surrender, then carry on down the list if it passes.
2. Within 1" of its task: Interact (the mission says what each Interact achieves), then Interact again.
3. In the open: Move away, then Throw smoke between itself and the target if it has one.
4. Otherwise: Shoot, then Move away.

**No target (Alerted)**

1. An open door between it and the marker within its Move: Move to it, close it and lock it (Interact). No such door (in the open): skip this line.
2. Otherwise: Move to its task and Interact.

**Investigates:** None. Saboteurs work their task and seal doors.

**Reactions**

- Unactivated: when shot at, Move away.
- Never goes on Overwatch.

**Close combat**

Breaks after any lost exchange. May surrender.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Automated

Enemy behavior profile · proposed

*Permanent Overwatch on its field of fire, or triggers on proximity.*
Used by: Automated defences, Cricket drones, Springbok AI.

**Target in sight (Engaged)**
1. Self-destruct drone with a player model within 2": Self-destruct.
2. Self-destruct drone: Move toward the nearest player model, twice, ending as close as it can.
3. Drone with no target within short range: Move to within short range with a target, then Shoot.
4. Otherwise: Shoot, then Overwatch. A turret only shoots into the field of fire the mission gives it.

**No target (Alerted)**
1. Turret: Overwatch.
2. Drone: Move toward the marker, then Overwatch.

**Investigates:** Drones only. Turrets never move.

**Reactions**
• Overwatch: Shoot at every trigger it can, up to two.
• Never Unaware: it does not hear noise, and starts on Overwatch.

**Close combat**
Never breaks; it has no melee weapon, so it loses every exchange it is forced into.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Leader

Enemy behavior profile · proposed

*Rallies the most suppressed friend nearby, then acts with its element.*
Used by: Recovery captain, UN Battalion Controller, UTG Mother.

**Player model within 6":** close quarters first (reference card).

**Target in sight (Engaged)**
1. A friend within 6" with 2 or more Suppression: Rally the most suppressed, then take one action from the line below.
2. Otherwise act as the profile of the nearest friendly element (Sentry if it is alone).

**No target (Alerted)**
1. A friend within 6" with 2 or more Suppression: Rally it.
2. Otherwise act as the profile of the nearest friendly element (Sentry if it is alone).

**Investigates:** Goes with the nearest element; raises its drill one step while within 6".

**Reactions**
• As the nearest friendly element.

**Close combat**
Breaks after a lost exchange if Wounded.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Handler

Enemy behavior profile · proposed

*Independent elite; protects the patron's interests first, the mission second.*
Used by: Directorate handler.

**Player model within 6":** close quarters first (reference card).

**Target in sight (Engaged)**
1. A player model within 6" of the patron's asset: Shoot it, Shoot it (or charge it, if within its Move).
2. Wounded or with 2 or more Suppression, and the asset safe or lost: Move away, toward the nearest exit or board edge. It escapes if it leaves the board.
3. Otherwise: Aim, then Shoot, picking Leaders first.

**No target (Alerted)**
1. Move toward the patron's asset; within 3" of it, Overwatch.

**Investigates:** Moves to the patron's asset, never toward the marker.

**Reactions**
• Overwatch: Shoot at the first trigger it can.
• Unactivated: when a player model comes within short range in its sight, Shoot.

**Close combat**
Breaks after a lost exchange if Wounded.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.

## Attached

Enemy behavior profile · proposed

*Uses the profile of the element it is attached to.*
Used by: Hired gun, Golem unit.

**Player model within 6":** close quarters first (reference card).

**Target in sight (Engaged)**
1. Act as the profile of the element it is attached to (Tactical if it is alone).

**No target (Alerted)**
1. Act as the profile of the element it is attached to (Tactical if it is alone).

**Investigates:** As the element it is attached to.

**Reactions**
• As the element it is attached to.

**Close combat**
As the element it is attached to.

Read each list top-down; take the first line that applies. Unaware models do not activate or react.
